## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 remain rejected under 35 U.S.C. 102(b) as being anticipated by Aiken. Aiken discloses an applicator comprised of a single tube housing 12 having multiple channels 24 (one on each side of element 22) and sealed with scores 16 at the ends thereof wherein rounded cotton swabs 18 are positioned on each end of the housing.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Aiken.

Although the swabs 18 in the Aiken device are not pointed, as claimed, it is the Examiner's position that it would have been obvious to one of ordinary skill in the art at

Art Unit: 3751

the time the invention was made that the swab can be designed to have any suitable shape, including the claimed shape, without effecting the overall operation of the device.

### ***Response to Arguments***

Applicant's arguments filed 6/24/02 have been fully considered but they are not persuasive. The Applicant contends that the Aiken reference is not applicable against the claims since it is made from a flexible material while the Applicant's invention requires a rigid material, the Aiken device requires separate components while the Applicant's invention is a one-piece housing and the ends of the Aiken device are not permanently sealed while the ends of the Applicant's device are permanently sealed. However, none of these features, i.e, a rigid material, a one-piece housing or permanently sealed ends, are claimed. As discussed supra, the Aiken reference discloses the device as claimed.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3751

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
